Features not available in Linux devices:

- LaunchBrowser macro
- Printer devices are not supported. Reports can be printed only on PDF files. Print of text reports and alarm events are not supported.

Features not available in JMobile PC Runtime:

- VNC and PDF Readers plug-in
- Manage Target
- System Settings Tool
- Backup/Restore
- Serial protocols that requires special hardware
- Multi touch features will be available if supported from the hardware and the operative system of the PC
